

**MAXCARE STANDARD MAINTENANCE DRUG LIST
(GENERIC/CHEMICAL NAME TO BRAND NAME)**

Drugs which appear on the Maintenance Drug List may be dispensed in multiple-month increments when prescribed in that quantity. Consideration should be given to stabilization of the drug therapy before the dispensing of quantities sufficient for up to 102-day supply in an attempt to reduce potential waste due to regimen changes or intolerance of the medication. Due to space constraints, not all manufacturer names for each medication are listed. If you do not find a certain medication on this list, please contact our office for assistance. There may be occasional additions or deletions to this list in compliance with Plan Sponsor instructions. Certain plans require an Initial Therapy of no more than a 34-day supply before quantities are allowed beyond a 34-day supply and up to a 102-day supply. Certain plans have other maximum day supply limitations. Please refer to your plan for specific coverage details.

The following list of medications are eligible for up to 3-month supply quantities.
